DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

I. Group I, claim(s) 1 – 39, 55 – 56 are drawn to a portable device with a sub body that is slidable in relative to a main body

II. Group II, claim(s) 40 – 51, 54 are drawn to a portable device with a sub body that is slidable relative to a main body and a display device which is fixed to a rotating plate that enables said display device to be rotatable relative to said sub body, which requires a search in Class 379/433.13

2. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper. The claim of Group II claims the above rotational feature thus requiring a search in Class 379/433.13.
